

Uses nature's incredible ability to 'consume' pollutants from the air.

Removes up to 90% of harmful chemicals from indoor air.

Improves building performance (by eliminating the need to heat or cool air from the outside).

Absolute design flexibility delivers a Nedlaw Living Wall perfect for your space.

Improved Indoor Air Quality makes occupants healthier and happier.

Immediately offers a robust and mature plant wall for beautiful aesthetics.

Nedlaw partners with you through Design, Build and Maintenance for a customized and long-term solution.

**NEDLAW**  
LIVING WALLS  
Rejuvenate with science.™

Unlike any other green vertical wall, a Nedlaw Living Wall is an active biofilter removing up to 90% of the toxins from indoor air.

A living wall biofilter continuously filters air and can be installed as free-standing, hybrid (tied into room circulation) or fully-integrated (into building). Nedlaw Living Wall biofilters are patented and the result of over 20 years of research by industry specialists and leading universities.

**A Nedlaw Living Wall** is a working machine that harnesses nature's remarkable ability to "eat" pollutants. Rather than bringing new air into a building (which needs to be heated or cooled), our patented biofilter draws air in, removes harmful pollutants and returns cleansed air, improving indoor environments and building performance.

Filtered air is drawn into the building's air circulation system or circulated using onboard fans.

Fan draws dirty air through plants and into the growth material where microbes 'eat' the pollutants as a food source.

## Design

From small-scale units which fit inside a boardroom to 3-storey installations, we can design any format to suit your space and needs. We have over 20 years experience with a broad range of projects from simple retrofits to fully-integrated mechanical components.

## Build

We fabricate and install each living wall biofilter on a custom basis, exactly as required by your design. Our experienced installation division works efficiently within your space.

## Maintain

Our Biofilter Technician Training Program guarantees well-educated maintenance service to ensure the long-term health of your biofilter.

Free Standing, Hybrid, Fully Integrated installations available.
