PROJECT
Longo's

LOCATION
Maple Leaf
Square
Toronto ON

WALL DETAILS
Double Sided
16' x 8' and
8' x 8'

Longo's innovative spaces include stone countertops, dark walnut finishes and porcelain-tiled floors. For this living wall biofilter project, energy-efficient compact fluorescent and high-bay fixtures were used for both general and ambient lights. This double-sided biofilter acts as a divider between the produce and check out areas.

In addition to removing harmful VOCs, the living wall biofilter provides noise dampening and a relaxing environment.
