

# PROJECT SHOWCASE

## PROJECT

University of  
Ottawa, Social  
Sciences Bldg

## LOCATION

120 University  
Ottawa ON

## WALL DETAILS

Six-storey,  
1,300 square  
feet

At six stories high, this is the tallest living wall biofilter in North America. The wall is located in the beautiful sky lit atrium and can also be seen from outside the building.

The wall is fully integrated into the building's air handling system and can provide 75 to 80 percent of the building's fresh air intake requirement, significantly reducing energy costs.
